Subject: RE: Juneau County Groundwater Screening Investigation | EPA in Wisconsin | US EPA

Hi Emily - please attribute the response below to EPA or an agency spokesperson. The sampling report can be downloaded here: <https://www.epa.gov/wi/juneau-county-groundwater-screening-investigation-documents>

EPA has finalized its Sampling Inspection Report related to the results of May 2018 groundwater testing conducted in Juneau County. EPA's tests – and others conducted by the county health department – found elevated levels of nitrates. The Sampling Inspection Report summarizes EPA's groundwater screening investigation with descriptions of sampling preparation and methods and discussions of sampling results including maps. Region 5 continues to work with Wisconsin Department of Natural Resources to determine appropriate next steps.

Hi Allison,

I am not on deadline today. I'll be doing a story on this tomorrow evening. The last time I had a chance to contact Francisco was when the test results were in, but not interpreted. I was gone for several weeks for my wedding and wanted to see if I could get the interpretation of those results.

Thanks,

Emily Davies

Hi Emily - I'm checking on your request with our water program. Do you have specific questions about the results? Also, are you on deadline?

Thanks,

Allison Lippert

Hi Francisco,

I've been meaning to follow up with you about what you found from testing the groundwater in Juneau and Wood Counties. Would you or someone have availability today or tomorrow to go over your findings with us either by skype or phone? I know there's a meeting tomorrow evening in Wisconsin Rapids for residents and the law firms that are now representing them. Will you have anyone attending that meeting?

Thanks for all of your help.

Best,

Emily Davies
